To Whom it may concern:

Square Stamping Mfg. used Potentia Management Group LLC for its lighting upgrade to LED lights. This upgrade not only improved the lighting in our facility; it also resulted in a significant electrical expense savings going forward. The project had a payback of less than two years.

Potentia was very easy to work with, very professional and their work was outstanding. They were able to change hundreds of light fixtures with no downtime to Square Stampings manufacturing production.

Thank you for your attention.

David S Allen

President
